Recommendation Rating: ★★★★★

After being laid off from my previous company, I found another job and visited the clinic for my second medical health checkup in six months before joining my new company. It took me 90 minutes one way to get to there, but Okochi-Naika Clinic in Inazawa City is definitely worth the trip!! I arrived at 11:00 a.m., and by 11:30, I had had all the tests, paid my bill, received all my results and was on my way home. The whole visit took less time than it took me to get there. The staff were just as wonderful as always. Realizing that I had left a 5-star review on Facebook last time, Doctor Okochi himself thanked me politely. As I tweeted last time, if only this clinic were closer to my home, I would definitely make him my regular doctor.

(2) A very kind clinic

Recommendation Rating: ★★★★★

Wait time: I was diagnosed with diabetes several years ago, and had been looking for a clinic that would be able to give me specialist treatment.

Access: I recommend going there by car. There is plenty of parking, and the sign is very visible, so you should have no trouble finding it.

Wait time: I usually make an appointment online, so very rarely have to wait for very long. The online booking system is very convenient because I can change or check my appointment time online as well.

Treatment: BYDUREON and the other oral medications I have been prescribed have brought my blood sugar levels down considerably. Other clinics did not suggest this kind of treatment, but this clinic actively suggested it. Diet therapy is also part of the treatment and I can get advice about diet from some registered nutritionists.

With diabetes, I have to have monthly blood tests, but at this clinic, drawing the blood sample is just a quick jab on the ear, which doesn't hurt. Of course, the results are ready that same day, so we know immediately the results of my efforts for the past month and they can be reflected in my treatment.

Doctor and Nurses: The doctor is not very talkative, but I feel that he is examining me and my condition thoroughly. The nurses are very friendly.

I have never had a bad experience even once at this clinic, and I intend to keep coming here.

Incidentally, prescriptions are filled outside the clinic, but the pharmacist next door is also very friendly and kind.

(3) Kind, thorough and empathetic

I have been troubled by unexplainable heart disease for 15 years, but after being diagnosed by Doctor Okochi, the real cause finally became clear. I no longer suffer from heart attacks and I am full of gratitude. At the moment, I am being treated for diabetes. I will keep coming to this clinic.

(4) I was diagnosed with diabetes several years ago and was being treated at another clinic, but...

Website: http://www.oishasan.jp/medical/area_search/23000/23220

I was diagnosed with diabetes several years ago and was being treated at another clinic, but I wasn't getting any better, until a friend told me about Okochi-Naika Clinic. Doctor Okochi looked just like the picture on the sign, and his kind manner made him very easy to talk to.

My glycemetic control (HbA1c) gradually got better and my anxieties eased. The clinic is very clean and beautiful. Now, my entire family goes to this clinic.

(5) My child loves it too

Woman in her 30s-40s

Even my child, who hates going to the doctor's, is happy to come to this clinic. Doctor Okochi is very kind, and makes my child happy by giving him stickers and capsule toys as treats for being good.

My favorite thing about this clinic is the way that the doctor greets us with a smile and a "Thank You" as soon as we enter the consultation room.

(6) I had to have an upper endoscopy for the first time and decided on this clinic when I was looking for a clinic that could perform it nasally.

Recommendation Rating: ★★★★★

I had to have an upper endoscopy for the first time and decided on this clinic when I was looking for a clinic that could perform it nasally. The doctor was very skilled so it didn't hurt, and I was surprised when it was over in only about five minutes! He also explained things very thoroughly.

Service: After the endoscopy, Doctor Okochi himself came out to the waiting room to talk to me. That shows how much he cares about his patients. The nurses and receptionists are all very polite and friendly, and they put me at ease.

Cleanliness: Very thorough. There was none of that hospital-like smell, and the new building and interiors have a lovely, warm atmosphere.

Wait time: I made an appointment for the upper endoscopy, so I did not have to wait at all. They always have magazines and books in the waiting room, and it is very comfortable, so any wait doesn't feel very long.

(7) It's very convenient because you can make appointments online.

Recommendation Rating: ★★★★★

It's very convenient because you can make appointments online. When I made an inquiry by e-mail, the response was very quick. Even though I sent the e-mail in the afternoon, they responded in time for me to be seen that evening. I also only had a short wait in the waiting room.

(8) I go to the clinic regularly for placenta injections. The fee is much more reasonable than other clinics!

Recommendation Rating: ★★★★★

I go to the clinic regularly for placenta injections. The fee is much more reasonable than other clinics!

Service: Very kind

Cleanliness: New and very clean

Wait time: There are busy times, but if you have an appointment, you will be seen promptly.

(9) I go once every two weeks for placenta injections

Website: <http://www.oishasan.jp/medical/detail/review/1051536.html>

I go once every two weeks for placenta injections. My skin has improved, and my shoulder stiffness and allergic rhinitis are also much better.
